

Financial Company Merger a Success with Office 365 Migration

Binary Tree facilitates the smooth migration of Office 365 tenants in financial giants' merger

The Solution: Binary Tree Power365® Integration Pro SaaS solution and services from Cloud Essentials.

Merging companies is never easy. But when you're in the highly-regulated world of finance, integrating IT environments can be even more tricky. So, when a global financial operator needed to combine its messaging and directories after an acquisition, it turned to Binary Tree by Quest for flexible migration software—and an experienced team with a history of M&A success.

THE CHALLENGE

PXP Solutions and Kalixa were planning to merge into a single brand as PXP Financial in a matter of a few weeks. The IT team was challenged to quickly enable the staff of both companies, who were in two different Office 365 tenants, to be able to send and receive email using the email domain of the new brand for the brand relaunch.

THE SOLUTION

Cloud Essentials used Binary Tree Power365 Integration Pro SaaS solution to integrate the two Office 365 tenants and unify the email domains for the launch of the new PXP Financials brand. In the next phase of the merger, Cloud Essentials will leverage the Binary Tree Power365 by Quest solution to consolidate the PXP and Kalixa Office 365 domains into a single tenant.

THE RESULTS

The users in both merging organizations are now able to send and receive emails using the new PXP Financial email domain while continuing to maintain their legacy email addresses until they could be phased out after the two Office 365 tenants are consolidated into a single tenant.
