

Binary Tree Integration for Notes

Seamlessly collaborate between Notes and Microsoft Exchange

Quest

When you move to a new mail and calendar tool, you often can't make the switch overnight. It can take months to get everyone on the same tool, particularly if you're in the middle of a merger or acquisition. So while you migrate, you need to make sure users on different tools can still work well together. Whether it's looking up the availability of other employees to make calendar scheduling easier, or faster collaboration on different platforms, integration allows for a more unified organization. Binary Tree Integration by Quest for Notes integrates separate platforms so your users can collaborate during a migration. It integrates email and calendars across on-premises or SmartCloud versions of Notes/Domino with Microsoft Exchange or Office 365. Use it as a short- or long-term solution to keep your users working smoothly.

SYNC

- Gain a Unified Directory
- Automate the integration between IBM and Microsoft
- Integrate mail, calendar, tasks, and directories for collaboration and productivity
- Sync on-premises or SmartCloud versions of Domino with Exchange or Office 365

MANAGE

- Coexistence Flexibility
- Scales to large enterprise integrations, including applications for M&As
- Solve transformation sync challenges like passwords and distribution lists
- Choose to integrate meeting rooms, attachments, appointments, and resources

COLLABORATE

- Enhanced communications
- Free/Busy calendar lookup for transparency and easier scheduling
- Find coworkers and team members faster for facilitated communication across the organization
- Keep your users productive on Day One without interruptions or downtime
