Binary Tree Migrator by Quest for Notes uses a proven, trusted process to automate your migration from Notes/Domino. It migrates Domino mailboxes and archives to the destination of your choice, including to Microsoft Exchange mailboxes, local archives, and on-premises or cloud-based Exchange archive mailboxes. With Binary Tree Migrator for Notes, you get unmatched data fidelity, an easy admin dashboard and uninterrupted calendar management.

**FEATURES**
- User mail files, mail-in databases and resources migration
- Built-in Automated Workload Distribution (AWD) functionality
- Real-time migration status monitoring
- Azure deployment support
- Office 365 and on-premises Exchange server support
