

# Binary Tree Power365<sup>®</sup> Directory Sync

Quest<sup>®</sup>

Binary Tree Power365<sup>®</sup> Directory Sync by Quest can set up and maintain a sync across Active Directory or Azure AD environments, or even between Active Directory and Azure AD. Now, users in merging organizations can find each other in a shared address book. As cloud-based software, Binary Tree Power365 Directory Sync helps establish Day 1 productivity and collaboration for mergers and acquisitions with a unified Global Address List.

## FEATURES

- Azure-based SaaS Directory Synchronization Solution
- Flexible AD-to-AD Synchronization with no direct Network Connectivity
- AD attribute data transformation and custom mapping
- Near real-time password synchronization for AD-to-AD
- Long-term Multi-Directional Password Synchronization
- Modular workflow components
- No Active Directory Trust required
- No need to configure VPNs, network routes, or firewall rules
- Detailed log files and change logs
- Supports Azure AD Business to Business (B2B)
- Trustless SID History Migration

## BENEFITS

- Synchronize complex environments
- Flexibly enable re-orgs, consolidations, and transformations
- Directory Management in addition to Migration without the weight of full identity management platforms

## NOTES

- Professional Services are required for Binary Tree Power365 Directory Sync
- User Interface available in English
