

# Binary Tree Power365® Integration

Quest®

Binary Tree Power365® Integration by Quest introduces Day One collaboration capabilities between multiple Office 365 tenants. You gain a unified workforce with automated coexistence between different tenants with a unified address list and global calendar availability between organizations. Binary Tree Power365 Integration includes Binary Tree Power365 Migration by Quest for comprehensive Day One collaboration and multi-tenant migration.

## FEATURES

- Automatic environment discovery and reporting
- Automatic matching and mapping, no manual lists to manage
- Unified address lists across business units or organizations
- Maintain collaboration with calendar sharing and free/busy lookups
- Easy account provisioning to create and license users
- Automated mail flow management before and after user migrations
- Active Directory and Azure Active Directory Synchronization
- Azure autoscaling ensures peak performance during changes in demand
- Complement Azure AD Connect by making direct changes to on-premises AD objects
- PowerShell RestAPI
- Migrate mailbox server side rules, user's Outlook signatures, and Auto-Replies (Out of Office)
- Create and migrate Azure AD B2B Guest Users

## BENEFITS

- Establish short- or long-term coexistence between organizations
- No complex software to install or configure with our Azure-based SaaS platform
- Includes all capabilities of the Binary Tree Power365 Migration by Quest product

## SPECS

- Professional Services are recommended for Binary Tree Power365 Integration
- Binary Tree Power365 Integration includes double-byte character support
- User Interface available in English, German, Chinese, Japanese and French
