

# Domino Application Services

Transform and retire your Domino apps

Domino Application Services is a best practices approach combined with advanced technology and professional services for transforming your legacy Domino applications and retiring your Domino infrastructure. Our approach starts with a detailed analysis of your Domino environment and the development of a customized roadmap for retiring, relocating, redeveloping, or retaining your Domino applications and retiring your environment. With Domino Application Services, you will be assured that your business is positioned for the future – without wasting resources on unused or outdated applications.

## ANALYZE

Our application analysis service includes inspecting and analyzing your Domino applications to provide you with key insights on their design, functionality, categorization, content, usage and security.

## RETIRE

For Domino applications with aged data, our application archiving service will help you retire application content to a client and server independent format.

## RELOCATE

For Domino applications based on standard templates, your critical content can be transformed to SharePoint or other modern application platforms with our application migration services. Your content will be handled by Quest experts for a reliable transformation.

## TRANSFORMATION ROADMAP

After analyzing your applications, we will help you accurately determine the path, time and cost of transforming your Domino applications. We help you plan the right path to migrating your Domino applications and retiring your Domino infrastructure.

Domino Application Services creates a clear and realistic approach for legacy application transformation and Domino retirement.
