Migration Services

Reach your specific goals led by Quest experts who perform hundreds of migrations every year. Whether you require expert advice, full project management, or something in between, our trusted advisors help you maximize your investment and guide you toward the outcomes you desire. We take the time to understand your unique business drivers through our high-level discovery and assessment of your environment. We provide you with a clear, defined plan for any project, with minimal impact and little to no downtime.

PLAN A PREDICTABLE PROJECT
A great way to power through the planning phase is to work with a partner like Quest who’s done this before. Our global, in-house teams have enterprise migrations down to a science. We can help you check the right boxes and get ready to migrate your email, applications and directories, including to or within the cloud. Quest assessments help you to identify common problems before starting a migration. Remediating any issues found during these assessments can shorten your timeframe, prevent budget overruns and minimize the impact of the transition process on your users.

MODERNIZE WITHOUT IMPACTING YOUR END USERS
Quest can move your email and data automatically, securely and minimize disruptions to your users. Depending on the size of your move, this phase could take weeks or even months. We can establish coexistence between the source and target environments so that your users can keep working during the move.

MANAGE THE PROCESS AT EVERY STEP
If you’re like most organizations whose IT teams are stretched thin, you might need help with this level of oversight. This is a great opportunity to engage a seasoned partner like Quest to manage the project from end-to-end. We can plan your project, move your data, and even train your users. This leaves you free to focus on what’s important to your business.

ABOUT QUEST
Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From database and systems management, to Active Directory and Office 365 management, and cyber security resilience, Quest helps customers solve their next IT challenge now. Quest Software. Where next meets now.
