

# Facilitate a Comprehensive Notes Migration

Notes Migrator | CMT uses a proven, trusted process to automate your migration from Notes/Domino. It migrates Domino mailboxes and archives to the destination of your choice, including to Microsoft Exchange mailboxes, local archives, and on-premises or cloud-based Exchange archive mailboxes. With Notes Migrator, you get unmatched data fidelity, an easy admin dashboard, and uninterrupted calendar management. Notes Migrator makes your migration easier for both users and admins. As you migrate, users can keep working, without fear of losing data. For example, they can schedule, update, reschedule, or even cancel calendar invites—even if some of the attendees aren't yet migrated. And admins can use the dashboard to create schedules, monitor status, and configure processing activities.

Manage your Notes migration easier and avoid frustrations with Notes Migrator | CMT.

**MIGRATE**  
Move Notes data and users

- > Efficiently migrate Notes users and data to Outlook, Exchange or Office 365
- > Migrate calendars, appointments, rooms, files, attachments, mail, contacts, lists and more
- > Even migrate archives with the included Notes Archive Migrator

**AUTOMATE**  
Save time and manage effectively

- > Comprehensive automation, including target environment choices, recovery solutions and user migration
- > Intelligent design ensures data fidelity from start to finish
- > Scalable to fit organizations of all sizes – even the largest enterprises

**MANAGE**  
Admin Insight and Oversight

- > Single dashboard to manage and execute the entire migration – avoid late nights and weekend projects
- > Users can work without interruption all through the migration, avoiding downtime
