

DOMINO RETIREMENT POWERED BY BINARY TREE

Transform to the next generation collaboration platform

Technological transformations are a part of life for evolving, growing organizations. You can benefit from the advancements of modern platforms including Exchange and Office 365, taking advantage of key productivity tools like OneDrive, Yammer, and Skype for Business. Binary Tree's Notes Migrator | CMT is the solution to help that transformation project. But what do you do with your previous messaging and collaboration platform?

Domino Retirement is a service to help you reduce unnecessary costs, by completing the migration to your new platform, without maintaining two collaboration environments simultaneously. That can consume IT resources, draining time and money and leading to multiple distractions to your organization. Through Domino Retirement, you will complete your migration and successfully terminate the use of your Domino environment, leaving the entire organization on one, common platform. As a result, you will save money and users will be incentivized to quickly adapt to applications for communication and collaboration, fostering productivity and unification.

COMMON PLATFORM

- › Complete a migration to a new, modern platform for collaboration
- › Reduce unnecessary costs of maintaining two platforms, simultaneously
- › Increase user adoption of the new platform and modern messaging tools

ABOUT NOTES MIGRATOR | CMT

- › Migrate from IBM Lotus Notes/Domino to Exchange, Outlook, or Office 365
- › Migrate it all—calendar appointments, meeting rooms, recurring meetings, and resources
- › Retain mailboxes, archives, distribution lists, attachments, contacts, and tasks

Smooth transition

With Domino Retirement, you will have a gradual, but steady, removal of Domino infrastructure, including mail, applications, gateways and servers

Eliminate redundancy

Eliminate and remove Domino administration, terminate all Domino licenses to save money and hassle from maintaining simultaneous platforms

A clear resolution

Domino Retirement completes the transition to a new direction in messaging and collaboration throughout the organization.

Application Modernization

With Application Modernization, Domino Retirement does not mean you lose your most trusted applications. Application Modernization is a service to ensure use of beneficial applications in your new environment.

Service highlights

SIX-STEP PROCESS

- > **Integration** of Domino and Microsoft Platforms – both messaging and collaboration
- > **Migration** of Domino Mail – to Exchange or Office 365
- > **Transition** of Domino Applications – to new, modern platforms
- > **Relocation** of any remaining Domino Servers and Services off premises – if applicable and necessary
- > **Phased Transition** of Remaining Domino Applications – to new, modern platform(s)
- > **Termination** of Domino and releasing Domino licenses – to complete the migration chapter

BENEFITS

- > New platform enablement
- > Reduce unnecessary cost and waste
- > Increase user adoption
