

Merger and Acquisition Solutions

Binary Tree brings you the successful experience from over 200 M&A projects. We can help you quickly integrate your directories, email, and applications to enable user collaboration between the merging organizations on Day One. This lets your teams find each other, send email, and schedule meetings. And post-merger, we can help you to consolidate your directory, messaging and application environments.

Day One User Collaboration Solutions

Prepare Your Messaging and Directories for Day One and Beyond

Binary Tree can provide an assessment of your messaging and directory infrastructures to check their health and get them ready to be integrated and consolidated for your merger, acquisition or divestiture.

Enable Interoperability between Office 365 Tenants

Binary Tree's **Power365®** is a Software-as-a-Service platform that makes it easy to unite users in two or more Office 365 tenants on Day One with a unified email domain, a unified Global Address List (GAL) and unified calendar lookups.

Enable Directory Interoperability

Binary Tree's **Directory Sync Pro** software and **Power365® Directory Sync** Software-as-a-Service establish synchronization between local and cloud directories so that email users in different organizations can easily find and communicate with each other.

Enable Notes-to-Exchange Interoperability

The **Notes Integration | CMT** software ensures the high-fidelity interchange of email, calendar entries, calendar free/busy availability, and mail-enabled applications to preserve the workflow of your users, regardless of their migration status.

Enable Day One Collaboration

- > Prepare your environment for integration and consolidation
- > Enable users in both organizations to send and receive email across corporate boundaries, look up contacts in a common directory, and to schedule and update meetings with the ability to check the availability of their colleagues

Merge Directories and Messaging

- > Merge your Active Directory environments
- > Migrate your email users and their archives to a consolidated messaging environment
- > Move and modernize applications to a consolidated environment
- > Supplement your help desk to support end-users through the transition

Post-Merger IT Integration and Consolidation Solutions

Merge Active Directory Environments

Binary Tree's **Active Directory Pro** software enables a project team to automate the migration and restructuring of Active Directory environments while ensuring full coexistence between migrated and un-migrated users.

Automate Office 365 Tenant Migrations

Binary Tree's **Power365** SaaS platform easily moves users, mail, public folders, OneDrive and SharePoint between Office 365 tenants without downtime.

Automate Exchange Migrations

The advanced automation capabilities in our **Exchange Pro** software streamlines the data collection, scheduling, forecasting, processing, reporting, and user communication processes for Exchange modernizations and migrations to Microsoft Office 365.

Migrate Notes to Exchange or Office 365

Notes Migrator | CMT is the most comprehensive software available for migrating from IBM Notes and Domino to Microsoft Office 365 and Exchange Server. Notes Migrator | CMT offers unmatched data fidelity, migration management, and migration throughout.

Move Notes Archives to Exchange

Binary Tree's **Self-Service Archive Migrator | CMT** software enables your end-users to seamlessly transition their local mail archives from Notes to Outlook and Exchange efficiently and effectively.

Migration-as-a-Service

Migration-as-a-Service is a low-stress, full-service approach to migrations. You can stay focused on your core business while Binary Tree handles your migration from end to end. Binary Tree offers Migration-as-a-Service for any migrations that involve IBM/Lotus Notes/Domino, SharePoint, Exchange, and even Office 365.

Domino Application Services

Domino Application Services creates a clear and realistic approach for the transformation legacy Domino applications. You will save time and money—not to mention gaining a more efficient migration—by enabling all collaboration and communication applications to be evaluated and transformed, where applicable, to the new platform.

Surround365®

Binary Tree's **Surround365** managed service unlocks the ROI from Office 365 with technical support, coaching, and training for your end-users and management, monitoring and reporting for your IT team.
