Microsoft Office 365 Migration Solutions

Whether you're looking to migrate to Office 365 or between Office 365 tenants, our software and services can move your users, email, public folders, and applications while enabling your users to continue to collaborate as you migrate. Binary Tree's solutions have moved over 7.5 million users for thousands of enterprises to the Office 365 cloud.

Migrate to Office 365

Prepare Your Messaging and Directories for the Migration

Binary Tree can assess and remediate your messaging and directory infrastructures, as well as merge multiple directory domains into a consolidated domain, to mitigate the risk of project delays and user downtime when you integrate with, and migrate to, Office 365.

Enable Directory Interoperability

When you are migrating to Office 365 from an Exchange environment, you will use Microsoft's Azure AD Connect to integrate your local AD to Azure AD in the cloud, however, if you have multiple local AD environments or existing Azure AD environments, you may need to supplement the Microsoft tool with Binary Tree's **Directory Sync Pro** Software or **Power365® Directory Sync** Software-as-a-Service.

Enable Notes-to-Office 365 User Interoperability

For migrating users from Notes to Office 365, our **Notes Integration | CMT** software ensures the high-fidelity interchange of email, calendar entries, free/busy availability, and mail-enabled applications to preserve workflow between migrated and non-migrated users.

Automate Mail Migrations from Exchange to Office 365

The advanced automation capabilities in our **Exchange Pro** software streamlines the data collection, scheduling, forecasting, processing, reporting, and user communication processes for Exchange mailbox and public folder migrations to Microsoft Office 365. Exchange Pro can also migrate public folder data to Office 365 Groups.
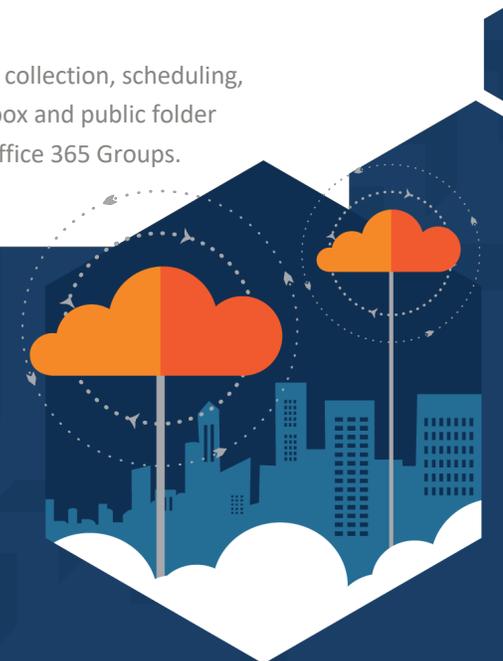

Migrate to Office 365

〉 Assess and remediate your source platform before your migration

〉 Establish user interoperability between the platforms

〉 Migrate users, mail, mail archives and public folders to Office 365

〉 Migrate Notes applications to SharePoint in Office 365

Migrate between Office 365 Tenants

〉 Assess and remediate your AD environment prior to migration

〉 Establish user interoperability between Office 365 tenants

〉 Enable users in each tenant to share the same email domain

〉 Migrate mail, mail archives and public folders between tenants

Move Notes Mail to Office 365

Notes Migrator | CMT is the most comprehensive software available for migrating from IBM/Lotus Notes to Microsoft Office 365. Notes Migrator | CMT offers unmatched data fidelity, migration management, and migration throughout.

Move Notes Archives to Office 365

Binary Tree's **Notes Archive Migrator | CMT** software simplifies the migration of local mail archives from Notes NSF files to Outlook PST files. Notes Archive Migrator | CMT manages the migration notifications, tracking and processing for end users to seamlessly transition their local mail archives.

Domino Application Services

Our **Domino Application Services** create a clear and realistic approach for legacy application transformation. You will cut costs by enabling all legacy collaboration and communication applications to be evaluated and either retired or transformed to new platforms.

Migration-as-a-Service

Migration-as-a-Service is a low-stress, full-service approach to migrations. You can stay focused on your core business while Binary Tree handles your migration from end to end. Binary Tree offers Migration-as-a-Service for any migrations that involve IBM Notes/Domino, SharePoint, Exchange, and Office 365.

"Binary Tree's software has been used to migrate millions of users from Notes to Microsoft Office 365 and has proven instrumental in the onboarding process."

– General Manager, Microsoft Office 365

Integrate Office 365 Tenants Long-Term

Power365® Directory Sync is a Software-as-a-Service directory synchronization solution that securely integrates local, cloud and hybrid Active Directory environments. It can be deployed in minutes as it avoids the time-consuming efforts of configuring VPNs, network routes, name server conditional forwarding, firewall rules and cross-organization health and compliance checks.

Integrate & Migrate Office 365 Tenants

Binary Tree's **Power365®** is a Software-as-a-Service platform that makes it easy to unify and move users between two or more Office 365 tenants to support mergers or long-term multi-tenant coexistence.

Power365 enables…

- A Unified Email Domain
- A Unified Global Address List
- Unified Calendar Lookups
- Domain moves without downtime
- High-Velocity Migrations of Mail, Public Folders, OneDrive and SharePoint
- Automation and orchestration of the required changes to on-premises Active Directory objects that are synchronized to Office 365

THE BINARY TREE ADVANTAGE
