

BINARY TREE™
Powering Enterprise Transformations®

**SELF-SERVICE ARCHIVE
MIGRATOR | CMT**

Manage and Migrate End-User Notes Archives

Self-Service Archive Migrator | CMT enables end users to seamlessly transition their local mail archives from Notes to Outlook and Exchange. As a companion product to the award-winning solution Notes Migrator | CMT, Self-Service Archive Migrator gives end users the ability to efficiently migrate archives for an effective transformation experience. With an easy to use interface and a simple installation and configuration process, you can quickly implement Self-Service Archive Migrator | CMT. Your end users will confidently convert their archives, and track their progress. The actual migration processing is run by end-users on their workstations or laptops, and all activities are tracked for reporting in a centralized repository.

Give end-users the power to manage their Notes archive migration with Notes Archive Migrator | CMT.

MIGRATE

Move Notes Archive data

- › Users choose designated archives to migrate
- › Empower end users over the archive migration process
- › Adapt to productivity demands and schedules for end users to limit impacts

MANAGE

Save time and manage effectively

- › Automated alerts to administrators for proper oversight of the migration process
- › Central tracking repository allows administrators to manage all migration tasks from a central location

CONVENIENT

Easy to migrate for end users

- › Runs on end-users' machines, removing bottlenecks and restraints from centralized processing
- › Step-by-step guided tasks through the UI facilitates a fast, simple end-user process
