

The Enterprise Cloud Transformation Platform for Microsoft Office 365

Whether you are completing a merger or acquisition, or maintaining global tenants or a hybrid environment, Power365® provides high-velocity migrations and robust integration between Office 365 tenants and on-premises environments. Power365 is an Azure-based, Software-as-a-Service platform that delivers efficient, secure, compliant transformations for even the most complex, enterprise initiatives—all with levels of options to meet your needs and without interrupting the productivity of your end-users.

Power365 enables Office 365 content migration as well as Day One integration of email addresses, directories and calendars.

MIGRATE
Power365® Migration

- > High-velocity migration of mail and archives between tenants
- > Migrate mail from on-premises and hosted Exchange to Office 365
- > Optionally migrate OneDrive and SharePoint content

INTEGRATE
Integration and Integration Pro

- Power365 Integration includes Migration and adds...
- > Unified Global Address Lists
 - > Unified free/busy lookups
 - > Active Directory support
 - > Public folder migration
- Power365 Integration Pro adds...
- > Email domain sharing
 - > Email domain moves without downtime!

SYNC
Power365® Directory Sync

- > Establish a Global Address List – plus sync attributes and passwords – from Day One
- > Sync Azure AD, Active Directory, or even between both environments
- > Highly customizable for even complex workflows

Watch an on-demand demo to see how it can automate your initiative!
