

# Ensure Data Integrity in Content Migration

Power365® Migration lets you migrate mailboxes and archives between Office 365 tenants with ease, all built on Microsoft Azure, for a secure, cloud-based transformation experience. With Power365 Migration, you can migrate from, or to, on-premises or hosted Exchange environments for even more application options. You can even choose options to migrate SharePoint and One Drive content for a comprehensive data and content migration. With Power365 Migration, you are ensured of maintaining data integrity and user confidence from start to finish. End users will have a positive migration experience, as you can schedule processes and synchronization events to occur when is convenient for your organization, minimizing impacts to business and productivity.

**Power365® Migration delivers a comprehensive Office 365 migration solution, all based in the security of Microsoft Azure.**

**MIGRATE**  
Move to Office 365

- › High-velocity migration of mail and archives between tenants
- › Migrate mail from on-premises and hosted Exchange to Office 365
- › Optionally migrate OneDrive and SharePoint content

**MANAGE**  
Schedule and configure

- › Schedule mail sync events and set recurrence amounts
- › Manage smaller subsets of users by leveraging existing on-prem. Active Directory groups
- › Direct outlook profiles to new, target mailboxes
- › Match users between tenants

**AUTOMATE**  
Reduce manual burdens

- › Email Automatically discover users and mail-enabled groups
- › Independent sync schedules and mail cutover events
- › Automate notification to end-users of new target mailbox availability
