

BINARY TREE®

Powering Enterprise Transformations®

Power365® Public Folders is included with Power365 Integration and Integration Pro for comprehensive content migration.

POWER365® PUBLIC FOLDERS

Efficiently Migrate Content and Permissions

Power365® Public Folders introduces a straight-forward approach to copying or transferring public folder information and permissions from one tenant to another. Manage your content with a flexible solution that enables full control over which content is migrated. Permissions controls are coordinated with automatic user discovery processes, making the process easier for your administrators. And your end users will be more productive with content migrated to familiar destinations, resulting in less time searching for files and folders. Power365 Public Folders delivers a complete content migration, so you can spend more time focused on your business—all included with Power365 Integration and Integration Pro.

Migrate

Move between Office 365 tenants

- High-velocity, unlimited and uncapped migration of mail and archives between tenants or from on-premises or hosted environments

- Migrate Groups, Teams and Public Folders

- Optionally migrate OneDrive, SharePoint, and OneNote

Automate

Avoid manual burdens

- Synchronization removes manual processes during migration

- Avoid breaking delegations with automation

- Permissions stamped based on matched discovery of users

Manage

Schedule and configure

- Define parts of hierarchy to be copied to the target tenant for more control and options

- Create new public folders in target tenant

- Schedule public folder migration for convenient times
