**Binary Tree** powers enterprise transformations. The company’s award-winning software and services help companies modernize email, directories and applications by moving and integrating them to the Microsoft cloud. Binary Tree mitigates the risk of downtime, delays and budget overruns that often come with complex transformation projects in large organizations. It understands enterprise migration requirements go well beyond the needs of small companies.

Binary Tree’s experts deliver low-risk, successful IT transformations. The company’s business-first approach helps plan, move and manage the transformation process from end to end so clients stay focused on their core businesses. Since 1993, the company has transformed more than 10,000 global clients and 46 million users, including 12 million users to Office 365.

**Plan a Predictable Project**
A great way to power through the planning phase is to partner with someone who’s done this before. Our global, in-house teams have enterprise migrations down to a science. We can help you check the right boxes and get ready to migrate your email, applications, and directories, including to or within the cloud. Our assessments help you to identify common problems before starting a migration. Remediating any issues found during these assessments can shorten your timeframe, prevent budget overruns and minimize the impact of the transition process on your users.

**Move Automatically without Impacting Your End-Users**
We can move your email and data automatically, securely and minimize any disruptions to your users. Depending on the size of your move, this phase could take weeks or even months. We can establish coexistence between the source and target environments so that your users can keep working during the move.

**Manage the Process at Every Step**
If you’re like most organizations whose IT teams are stretched a bit thin, you might need a bit of help with this level of oversight. This is a great opportunity to engage a seasoned partner like Binary Tree to manage the project from end-to-end. We can plan your project, move your data, and even train your users. All the while, you stay focused on your core business.
Plan
Assessments
An Assessment from Binary Tree is a cost-effective way to check the health of your existing Active Directory, Exchange, or Notes environment and get ready for an efficient transformation.

Modernize
Migration-as-a-Service
Migration-as-a-Service is a low-stress, full-service approach to migrations. You can stay focused on your core business while Binary Tree handles your migration from end to end. Binary Tree offers Migration-as-a-Service for any migrations that involve IBM Notes/Domino, SharePoint, Exchange, and even Office 365.

Domino Application Services
Domino Application Services create a clear and realistic approach for legacy application transformation. You will save time and money—not to mention gaining a more efficient migration—by enabling all collaboration and communication applications to be evaluated and transformed, where applicable, to the new platform.

Manage
Domino on Azure
Domino on Azure, a managed service, enables you to significantly reduce your costs to maintain a Domino infrastructure by moving your Domino servers to the Microsoft Azure Cloud.

e-Learning
e-Learning provides your end-users with the resources they need to become proficient and enhance their productivity.

Notes Integration Assurance
Notes Integration Assurance is a thorough assessment of existing free/busy integration for Binary Tree Notes Integration | CMT users to gain a more efficient, integrated environment. These periodic checks help keep your integration performing at its best. They can help make sure that your tools don’t slow or stop, which keeps your organization productive.
