

Proactive Checks for a Successful Transformation

Migrating your messaging platforms can be a complex challenge. It can be costly and time-consuming to fix any issues—or they could prevent a successful migration. So, before you get started, it's best to do an assessment to find and fix any issues that might slow or stall your project. A proactive assessment often saves 2-4 times the cost of fixing issues during and after your migration. Plus, those who try to do an assessment themselves often spend 5-10 times more in staffing and operational costs than when they work with an experienced partner like Binary Tree. An assessment from Binary Tree is a cost-effective way to check the health of your existing environment and get ready for an efficient transformation.

With Assessments for Notes, Active Directory and Exchange, our experts can help get your project started on the right track.

NOTES

- › Reduce time to migrate
- › Improve savings and decrease impacts to end-users and resources
- › In-depth analysis with a presentation and report on recommendations
- › Migrate from Notes more efficiently

ACTIVE DIRECTORY

- › Three-phase approach from project kickoff to report completion and presentation
- › Check the health of your AD environment to improve performance
- › Migrate or consolidate Active Directory environments in less time

EXCHANGE

- › Prepare for a migration to Office 365 or a modern version of Exchange
- › Reduce migration times and improve efficiencies
- › Comprehensive analysis and report of Exchange servers and environments
