What's New in Version 18.12

Directory Sync Pro 18.12 has been certified to work with Active Directory Domain and Forest Functional Level 2012 and supports new cumulative updates to SQL Server. A full list of changes for this release is presented below.

Going forward, the release version number now represents the year and month of the release (18.12). The last GA release of Directory Sync Pro was 18.9 released in September 2018 and before that was 6.1 release in July 2018.

Release Notes 18.12

- The ability to delete the Sync Reports has been added. (38812)
- The message received when you attempt to apply an expired license has been updated to state the license is expired and to contact Binary Tree Support for assistance. (56317)
- An option to "Match Contacts to Existing Objects" has been added to the Groups settings of Domino to AD profiles. When this option is enabled, Directory Sync Pro will attempt to match external members to existing objects in the target environment. (57380)
- An option to create multi-purpose and mail-only Domino Groups as mail-enabled Security Groups in Active Directory has been added. (57402)
- An issue where a User Principal Name (UPN) override could not set the UPN suffix to a value different from the object's target domain has been resolved. (59262)
- An issue where internal users with Domino group membership entered with the SMTP (Internet Address) instead of the Domino Hierarchical name would be synchronized as Contacts has been resolved. (59319)
- Directory Sync Pro has been certified to work with Active Directory Domain and Forest Functional Level 2012 (59335)
- An alternate Directory Sync Pro Log Viewer that can be accessed from the Start menu has been added. (59336)
- The following cumulative updates are now supported:
 - Cumulative Update 13 for SQL Server 2014 SP2
 - Cumulative Update 3 for SQL Server 2016 SP2
 - Cumulative Update 11 for SQL Server 2017(59337)
- An issue where contacts that are members of groups were not syncing from the source to the target has been resolved. (59413)
- An issue where a "Match Only" profile was burning a license when attempting to delete an object has been resolved. (59490)
- An issue where running two instances of Directory Sync Pro from the Command Line caused an error has been resolved. (59567)

About Binary Tree

Binary Tree is a Microsoft Gold Partner for messaging, cloud productivity and application development and is dedicated to and focused on enterprise transformations to Microsoft platforms. Since 1993, Binary Tree has transformed more than 8,000 global clients and 42 million users, including 7.5 million users to Office 365. The company is a globally preferred vendor for Office 365. Its headquarters is located outside of New York City with global offices in France, Germany, Singapore, Sweden and the U.K. Its award-winning software and services help companies modernize email, directories and applications by moving and integrating them to the Microsoft cloud. The company's business-first approach helps plan, move and manage the transformation process from end to end so that clients can stay focused on their core businesses. Binary Tree's experts deliver low-risk, successful IT transformations. Visit www.binarytree.com for more information.
