

Binary Tree, HP Spain, and Global TMS Create a Transformational Blueprint to Upgrade the Budimex Messaging Platform

“Leveraging the close relationship of HP Spain with Global TMS ensured the best possible engagement. The entire team was able to meet our requirements for flexibility and frequent communications. Thanks to a team effort and Binary Tree solutions, our migration project was a great success.”

— Project Management Team, Budimex

Project Overview

Budimex was updating its communications platform as part of a corporate-wide technology initiative to transition all operating companies to the same messaging platform. In the case of Budimex, this meant a transition from IBM/Lotus Notes to Microsoft Exchange on-premises.

As a company devoted to high-profile infrastructure projects and committed to sustainable development and corporate social responsibility, smooth and uninterrupted communications are critical. Therefore, the project requirements included flexibility, consistent communications among all parties, coexistence, no disruption for its 2,600 users, and a gradual migration at the rate of 50 users per day.

With Binary Tree migration solutions in place, Budimex relied on its excellent long-standing relationships with HP Spain and Global TMS to manage the planning, coexistence, and migration throughout the project.

budimex

Case Study Highlights

Migrated from: IBM/Lotus Notes

Migrated to: Microsoft Exchange

Country: Poland

Industry: Construction/Infrastructure

Customer Profile

Budimex Group is one of the largest construction companies in Poland focused on infrastructure projects. Budimex employs approximately 5,000 employees and partners with 12,000 businesses, completing over 100 contracts a year. Since 2011, it has been a part of the RESPECT index, which includes the most responsible companies in Central and Eastern Europe. Budimex is a subsidiary of Grupo Ferrovial, S.A., a multinational leader in design, construction, and financing of infrastructure projects.

Solution

Budimex relied on Binary Tree’s migration products and its excellent long-standing relationships with HP Spain and Global TMS to manage the planning, coexistence, and migration throughout the project.

Benefits

- Alignment with parent company standards
- Phased migration approach ensured no user disruption
- Partner flexibility to facilitate end user business requirements
- Coexistence during and post-migration
- Tight collaboration between HP, Global TMS and Budimex teams

Examples of Budimex Construction Projects

Collaboration, Communication and Flexibility

After its parent company, Ferrovial, had initiated the process of platform standardization, Budimex began looking at solutions that would quickly and easily transition its IBM/Lotus Notes environment to Microsoft Exchange—with no disruption to its 2,600 users.

Budimex needed to find partner companies that could be flexible, work with their project managers on a weekly basis, have an excellent support team, and offer tools that would complete the migration with no effect on user productivity. With assistance from partners HP Spain and Global TMS, Binary Tree's Notes Migrator CMT and Notes Integration CMT were selected as the best solutions to make this transition.

Notes Migrator CMT offers migration throughput, transitional calendar workflow, and migration management, while Notes Integration CMT creates high-fidelity interoperability and preserves user workflow between IBM/Lotus Notes and Microsoft Exchange. This solution is ideal for a migration performed over a relatively long period of time, where coexistence between two platforms is a requirement, and where application remediation is necessary over time.

In the end, the project was successfully completed at the appropriate pace, on time, and with no adverse effects on user productivity. Now, Budimex is aligned with its parent company and its users are enjoying the benefits of its upgraded messaging platform.

About Our Partners
