

Powerful and efficient cloud-based, tenant-to-tenant transformations

Whether you are completing a merger or acquisition or maintaining global tenants or a hybrid environment, Power365® Tenant-to-Tenant solutions provide high-velocity migrations and robust integration between Office 365 tenants. Built on Azure platform, Power365 provides a secure, compliant migration experience, solving even the most complex, enterprise transformations. Power365 provides a user-friendly interface, comprehensive reporting, and security and access rights controls to adapt to your business needs. With three tiers, you get a complete tenant-to-tenant transformation with the flexibility to choose a solution best for your organization.

Power365® Migration and Integration enable Day One productivity and collaboration for Office 365 tenant transformations.

MIGRATION

- > High-velocity, unlimited and uncapped migration of mail and archives between tenants
- > Migrate mail from on-premises and hosted Exchange to Office 365
- > Optionally migrate Teams, Groups, OneDrive, SharePoint, and OneNote content

INTEGRATION

- Power365 Integration includes Migration and adds...
- > Unified Global Address Lists
 - > Unified free/busy lookups
 - > Active Directory support
 - > Public folder migration

INTEGRATION PRO

- Power365 Integration Pro includes everything in Integration, plus...
- > Email domain sharing
 - > Email domain moves without downtime
